

Heating Units

The Relief Pak® moist heat product line just got better!

Meet the newest additions to the Relief Pak® product line: **Relief Pak® Heating Units**

Relief Pak® heating units make using moist heat packs safer and more efficient. Each unit (4, 6, 8, 12, and 24 pack capacity) is made from durable, seamless stainless steel with insulation for both safety and efficiency.

The Relief Pak® heating units feature insulation which truly makes them unique. While the unit is at its set operating temperature, the exterior remains safe to touch. In addition, the insulation helps the heating unit maintain its temperature, which helps to reduce operating costs.

Relief Pak® heating units complement FEI's existing line of heat therapy products. Clinic owners and therapists can trust FEI to provide a complete line of products to suit their every need. Units have a one year warranty. Parts and service are available.
